#### Notes

- a. Package limited
- b. Pulse test; pulse width  $\leq 300~\mu s,$  duty cycle  $\leq 2~\%$
- c. When mounted on 1" square PCB (FR4 material)
- d. See solder profile (<u>www.vishay.com/doc?73257</u>). The PowerPAK 8 x 8L is a leadless package. The end of the lead terminal is exposed copper (not plated) as a result of the singulation process in manufacturing. A solder fillet at the exposed copper tip cannot be guaranteed and is not required to ensure adequate bottom side solder interconnection
- e. Rework conditions: manual soldering with a soldering iron is not recommended for leadless components

- b. Guaranteed by design, not subject to production testing
- c. Independent of operating temperature

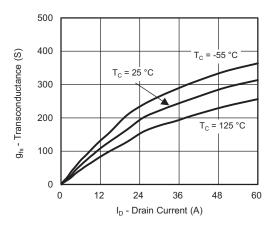

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.
